**Your breath becomes music.
A natural expression of your heart,
It adds new color to your life.**

Yamaha Recorders

Plant-based plastic Recorders

Plant-based materials and state-of-the-art technology combine to create plant-based plastic recorders that are gentle on the environment, a pleasure to play, and deliver rich, musical tone.

Page
2

ABS Resin Recorders

ABS recorders are durable and easy to care for while providing a tone similar to that of natural wood. Many schools throughout the world insist on Yamaha recorders thanks to their accurate intonation, easy playability, and rich expressive sound.

Page
4

Wooden Recorders

Handcrafted from carefully selected woods, these instruments are for players serious about their music. Yamaha wooden recorders have earned a high reputation from professional soloists down to amateur enthusiasts.

Page
8

Harmony Recorders

In addition to the more common soprano and alto recorders, ensembles often require recorders in other keys such as tenor, bass, and even 'Great' bass recorders. Yamaha offers a full line of top quality instruments.

Page
12

'Rainbow' Recorders

Translucent colored recorders can make practicing more fun for students. They are made of ABS resin and offer the same fine qualities as Yamaha's other ABS resin recorders.

Plant-based Plastic Recorders

Gentle on the Earth...

These recorders were conceived from the question: "What can we do for the future of our children?" The recorder bodies are made of plant-based PLA Compound Resin "TERRAMAC®" developed by Unitika Ltd., that offers environmental friendliness as well as improved musical instrument performance.

Materials that are gentle on the environment

Bodies made of plant-based PLA Compound Resin "TERRAMAC®": the world's first application of environmentally friendly plant based materials in a musical instrument.

Improved instrument performance

The change in material has resulted in a mellow, centered tone that is similar to that of wood recorders, plus improved breath response and high-register control.

Newly adopted plant-like colors

Bright colors chosen to elicit the image of plants such as corn and others have been used in the recorders and cases for the first time.

Cotton Case Bags

The recorder cases are made from environmentally friendly natural cotton.

YRS-401 Case

YRA-48B Case

YRA-402B Case

Plant-based PLA Compound Resin "TERRAMAC®"

TERRAMAC® is an environmentally friendly material made by using proprietary technology from UNITIKA LTD. to combine polylactic acid (PLA) with other materials and then improve and mold the result. Currently, it is widely used in products ranging from food containers to components for electronic devices. Yamaha uses TERRAMAC® in recorders, retaining the same durability, strength, and appearance as conventional ABS resin while reducing CO₂ emissions.

20 & 30 Series Recorders

A Perfect Musical Foundation...

Yamaha's 20 and 30 Series recorders are designed to provide a perfect start to anyone's musical education. They offer an ideal amount of air resistance for easy control, and feature an accuracy of intonation you would expect to find only on more expensive models. Though other maker's plastic recorders may have a similar appearance, Yamaha ABS recorders are truly superior instruments. Models are available with either 'German' or 'Baroque' fingering systems. The 20 series, easy to play throughout their ranges, are primarily intended for beginners. 30 series recorders, which feature an arched windway for improved breath control and tonal expression, are for more advanced players.

Yamaha delivers safe and reliable products.

From raw materials selection to manufacturing processes, we pay the closest attention to produce Yamaha recorders with safety and reliability.

- Our ABS recorders comply with the following regulations related to the production and use of chemical substances. (as of April, 2023)
 - Japan: Food Sanitation Law
 - Europe: REACH (Registration, Evaluation, Authorization and Restriction of Chemicals)
 - USA: CPSIA (Consumer Product Safety Improvement Act)
- Manufacturing at factories with ISO quality certification.
- Ultrasonic adhesion technology used in assembling parts of soprano and alto recorders instead of adhesive bonding.

■ Cotton Case Bags

The recorder cases are made from environmentally friendly natural cotton.

Fife

YRF-21

A fife with a rich tone and good playability. Its clear sound carries well, especially suited for fife and drum corps.

300 Series Recorders

For Those Serious About Their Music...

The 300 series offers a complete range of top quality recorders—from bass to soprano. All these instruments deliver a rich body of sound, while providing the convenience of a durable, maintenance-free ABS resin construction. With their broad range of tonal expression and their superb playability, these recorders are fully competitive with more expensive wooden models. The 300 Series recorders come in a variety of styles, some offering simulated wood finishes.

Wooden Recorders

The Beauty of Natural Wood...

Many players insist on the tonal qualities of natural wood. When it has been specially seasoned, natural wood creates a tone of great depth; a tone that is warm, glowing, alive. Yamaha offers a complete line-up of wooden recorders, from our inexpensive 40 series to handmade models that will satisfy the most demanding soloist. Our professional 60, 80, 800 and 900 series recorders are available in a variety of woods for subtle sound differences.

Wood Materials

Kingwood

A very hard and dense wood, Kingwood gives a strong, broad tone. (Gravity after drying approx. 1.2)

Rosewood

A hard heavy wood for vigorous tone, with rich overtones similar to Kingwood, but a little softer and sweeter. (Gravity after drying approx. 1.0)

Ebony

Another hard, dense wood characterized by easy response, and a clear elegant sound. (Gravity after drying approx. 1.0)

Castellowood

A softer wood with a beautiful warm tone, good for expressing subtle musical nuances. Though it is not technically a boxwood, it is commonly referred to as "Castello Boxwood". (Gravity after drying approx. 0.7)

Maple

A wood of medium hardness for a soft and pure tone which blends well in ensembles. (Gravity after drying approx. 0.6)

Environmentally-conscious lead-free processes

Wooden recorders use lead-free coatings and lead-free solder.

Cotton Case Bags

The recorder cases are made from environmentally friendly natural cotton.

Sopranino Case

Harmony Recorders

Completing The Lineup...

In addition to the more common soprano and alto recorders, ensembles often call for other keys such as tenor, bass, and even 'Great' bass recorders. Yamaha offers a full line of top quality tenor and bass recorders in both ABS resin and natural wood materials. In addition, Yamaha's Great Bass recorder plays with a surprisingly efficient balance between air and broad focused sound.

Bass

Tenor

YRT-304BII

Thumb rest

Yamaha Recorder Features

All models in the extensive Yamaha recorder lineup have been created with meticulous attention to detail and offer consistently high quality. A variety of materials, registers, and fingerings are available to meet a wide range of player requirements.

Part Names and Features

Beak
The thickness and curve are carefully designed for an easy playability.

Window

Lip (or Labium)
The lip controls the airflow inside. The front edge of the lip is chamfered for a smooth response.

Middlejoint

Footjoint

Windway

Headjoint
The head shape significantly affects the recorder sound. Yamaha's unique technology has achieved making a thick molded head on ABS resin models for a tone as similar as possible to natural wood.

Toneholes
The intonation of the recorder is determined by the body length, the inner diameter and taper, and the dimensions and placement of the tonehole. Yamaha has coupled their expertise in crafting the Wooden Recorders with state-of-the-art design technology for optimum tonehole design. In addition, Yamaha's 3 piece construction permits some fine tuning of the tonehole positions.

Fingering Systems

Yamaha offers a choice of either "Baroque" or "German" fingering systems on many models to accommodate local preferences and traditions.

German System

Large

Small

Baroque System

Small

Large

Windway Shapes

There are two different windways: arched and straight.

Straight Windway

Easy to play with a soft pure tone. This is ideal for beginners.

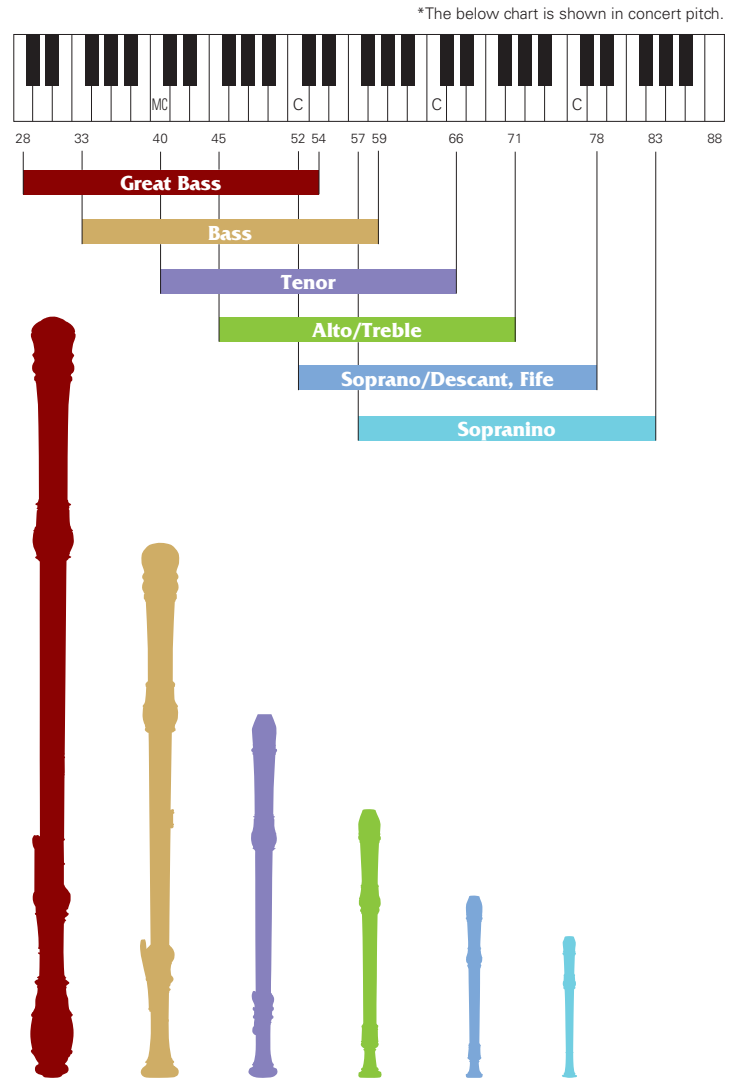

Arched Windway

It has a slight resistance when you play for better breath control which gives greater tonal expressivity and projection.

Yamaha Recorder Types and Registers

The broad musical range of the recorder makes it an excellent choice for both solo and ensemble playing. Six types are available in different registers.

Accessories

Recorder Cream

Apply a thin coating when the joint is too tight.

* Do not use any other cream besides recorder cream for ABS resin models and Plant-based Plastic models.

Cork Grease (for wooden models)

Before assembly, apply thinly to the joint cork.
